

Code-Layout, Readability and Reusability

Date	5 July 2026
Team ID	Individual
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the project source code based on its layout, readability, maintainability, and reusability. The project follows Python coding standards by maintaining proper indentation, meaningful naming conventions, modular programming, and adequate documentation. These practices ensure that the code is easy to understand, maintain, and extend for future enhancements.

.Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used throughout the code	Yes	Four-space indentation is used consistently following Python standards..
2	Proper File Structure	Files and folders are logically organized	Yes	Project files are organized into data, notebooks, models, templates, static, and application folders.

3	Meaningful Variable Names	Variables reflect their purpose clearly	Yes	Variable names are descriptive and improve code readability.
4	Function / Method Names	Functions are descriptively named	Yes	Each function name clearly represents its purpose.
5	Code Comments	Inline and block comments explain logic	Yes	Important sections include comments explaining functionality.
6	Modular Design	Code is split into reusable functions/modules	Yes	Separate modules are used for preprocessing, training, prediction, and Flask application..
7	No Redundant Code	Duplicate or unused code is removed	Yes	Duplicate and unnecessary code removed during development.
8	Error Handling	Exceptions and errors are handled gracefully	Yes	Basic input validation and exception handling are implemented..

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
1	Data Preprocessing Module	Python	Data Preparation	High
2	Feature Engineering Module	Python	Model Training	High
3	Machine Learning Model	Scikit-learn	Prediction System	High
4	Flask Web Application	Flask	User Interface	High
5	HTML Templates	HTML/CSS	Web Pages	Medium

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	5	The project follows a clear and organized folder structure.
Readability	5	Meaningful identifiers and comments make the code easy to understand..
Reusability	5	Modular design allows components to be reused in different parts of the application.
Documentation / Comments	5	Adequate comments improve code understanding and maintenance..
Overall Score	5/5	The project follows good coding practices and software engineering principles.
