

Coding & Solution

Date	05 July 2026
Team ID	
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	5 Marks

Coding & Solution Summary

Field	Details
Repository Link / URL	https://github.com/saiharshithaperuri-31/A-Comprehensive-Measure-of-Well-Being
Programming Language(s)	Python, HTML, CSS
Framework(s) Used	Flask, Scikit-learn
Key Features Implemented	Human Development Index prediction using Machine Learning Country selection through dropdown menu Prediction based on Expected Years of Schooling Prediction based on Mean Years of Schooling Prediction based on Gross National Income per Capita Automatic HDI category classification (Low, Medium, High, Very High) Attractive Flask web interface Model deployment using Render
Pending / Incomplete Features	No pending features. All planned functionalities have been implemented successfully.

Setup / Run Instructions	1. Clone the GitHub repository. 2. Install required libraries using pip install -r requirements.txt. 3. Navigate to the project folder. 4. Run python app.py. 5. Open http://127.0.0.1:5000 in your browser.
--------------------------	--

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

The project follows clean coding practices with modular Python code, meaningful naming conventions, and appropriate documentation. The Flask web application provides a responsive user interface for predicting the Human Development Index category based on development indicators. The machine learning model is trained using Scikit-learn and saved using Pickle for efficient prediction. The project has been tested with multiple input values to ensure accurate prediction results and is maintained using GitHub version control
