

Brainstorming and Idea Prioritizing

Date	05 JULY 2026
Team ID	XXXXXX
Project Name	A Comprehensive Measure of Well-Being
Maximum marks	3 Marks

Step 1: Brainstorm and Idea Listing

S.NO	Team Member	Idea/Suggestion	Category
1	Peruri Sai Harshitha	Develop a Machine Learning model to predict a country's Human Development Index (HDI) category using indicators such as Life Expectancy, Expected Years of Schooling, Mean Years of Schooling, and Gross National Income (GNI) per capita.	Machine Learning
2	Peruri Sai Harshitha	Perform Exploratory Data Analysis (EDA) and visualize relationships between HDI indicators to identify important trends and patterns.	Data Analysis
3	Peruri Sai Harshitha	Perform data preprocessing by cleaning missing values, converting numerical features, selecting relevant attributes, and preparing the dataset for machine learning.	Data Preprocessing

4	Peruri Sai Harshitha	Train and evaluate different Machine Learning models and select the best-performing model for HDI prediction.	Model Development
5	Peruri Sai Harshitha	Develop a Flask-based web application that allows users to enter country development indicators and instantly predicts the Human Development category	Web Application

Step 2: Idea Prioritization

Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
Develop a Machine Learning model to predict Human Development Index (HDI) categories using socio-economic indicators such as Life Expectancy, Education, and Gross National Income (GNI) per capita to measure overall well-being.	High	High	1	Yes
Build a Flask-based web application that enables users to enter development indicators and receive HDI category predictions in real time.	High	High	2	Yes
Perform Exploratory Data Analysis (EDA), data preprocessing, feature selection, visualization, and model evaluation to improve prediction accuracy and better understand factors affecting human development	High	High	3	Yes
