Customer Journey Map

A Comprehensive Measure of Well-Being Customer Journey Map

This map illustrates the steps followed by a user while predicting the Human Development Index (HDI) category of a country using the web application.

STAGE	1. AWARENESS	2. EXPLORE	3. DATA ENTRY	4. PREDICTION	5. RESULTS	6. DECISION MAKING
USER ACTION	User opens the application.	User reads about the project and the inputs required.	User enters values for: • Life Expectancy at Birth • Mean Years of Schooling • Expected Years of Schooling • GNI per Capita (USD)	User clicks on the "Predict" button.	User views the predicted HDI category.	User uses the result for learning, research or policy analysis.
USER THINKING	I want to know the HDI level of a country.	What information do I need to provide?	I hope the values I enter are correct.	What will be the HDI category?	Now I know the human development level of the country.	This information will help me compare and make better decisions.
SYSTEM RESPONSE	Displays the home page with a brief introduction.	Shows a description of the project and required indicators.	Validates the entered data and checks for any errors or missing values.	The ML model processes the input values and predicts the HDI category.	Displays the predicted category: Very High, High, Medium, or Low.	Result can be used for research, analysis and policy formulation.
USER GOAL	Find a tool to predict a country's human development.	Understand what data is needed to make a prediction.	Provide accurate information for a reliable prediction.	Get the HDI category quickly and accurately.	Understand the country's level of human development.	Use insights for education, research or policymaking.
EMOTIONS	 Curious	 Inquisitive	 Hopeful	 Expectant	 Satisfied	 Empowered

★ **Outcome:** The user successfully obtains the Human Development Index (HDI) category of a country and can utilize the prediction for academic, research, or policy-making purposes.
