Data Flow Diagram

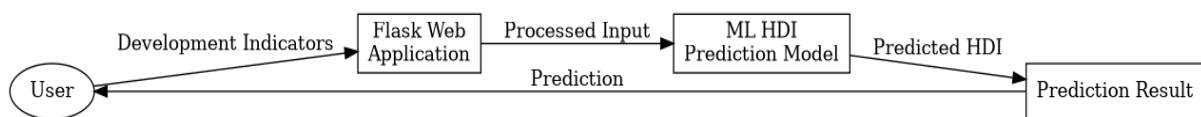

The Data Flow Diagram (DFD) illustrates the flow of data through the Human Development Index (HDI) Prediction System developed for the project "A Comprehensive Measure of Well-Being." It shows how the user provides development indicators such as Life Expectancy, Expected Years of Schooling, Mean Years of Schooling, and Gross National Income (GNI) per capita through the Flask web application. The system processes the input using the trained Machine Learning model and returns the predicted Human Development Index (HDI) category. This demonstrates the interaction between the user, web application, trained model, and prediction result.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	User enters Human Development indicators and receives prediction results.

Rectangle with number	Process	Flask application validates input and sends it to the Machine Learning model for prediction.
Rectangle	Data Store	Stores the trained Random Forest model used for HDI prediction.
Arrow	Data Flow	Represents the movement of input data and prediction results between the user, application, and model..
